The Niche:

I've been creating videos since 2006. Over 1500 videos across various platforms and mostly focusing on tech products. In the beginning, a lot of the videos were computer repairs and 'how-to' fix computer issues. As the channel evolved, the content changed. I still review some computers but I prefer working with consumer electronics such as flashlights, dashcams, security cameras and retro gaming consoles. Though some of my videos that focus on ebikes and power tools have done well.
